ABSTRACT

Designed to provide information about the current status and future direction of Maryland's community college system, this report offers a summary and overview of all aspects of community college functioning in the state. Section I provides an organizational chart of higher education in Maryland; and data on undergraduate credit enrollments, and births and high school graduation rates. Section II provides data tables covering: 1985 credit enrollment by program area, student status, race, and residence; state-funded credit and equated credit full-time equivalent (FTE) enrollment, 1981-1985; state-funded continuing education course enrollment, 1982-1985; FTE enrollment for state aid; and FTE students, registrations, and courses in non-state funded continuing education. Section III looks at student financial support in terms of dollar amount, type of support, and type of institution. Section IV provides tables and graphs showing degrees and certificates awarded, focusing on characteristics of recipients, types of degrees awarded, and trends. Revenue and expenditure data are presented in section V, broken down into cost of administering state aid, unrestricted revenues by source, contributions, and net cost per FTE. After section VI offers data on administrator and faculty salaries and fringe benefits, section VII provides information on physical facilities, space utilization, and capital construction state bond authorizations. Finally, section VIII presents tables showing tuition per 15-week term, 1986; and student-faculty ratio, 1981-1985; along with an organizational chart for the Maryland State Board for Community Colleges and a map of the state. FOREWORD

The State Board for Community Colleges is pleased to present its annual compilation of community college data. This Databook is part of the State Board's continuing effort to provide information about the current status and future direction of Maryland's community college system.

The document is meant to be a summary and overview of all aspects of community college functioning in Maryland. The financial and enrollment data reported here are supplemented by the Board's State Plan for Community Colleges in Maryland and other publications. Additional information is available upon request from the State Board office.

Our intent is for this Databook to be useful to members of the General Assembly, agencies of the Executive Branch, college personnel, students, and the public at large. To the extent that this report captures the essence of community college service to the people of Maryland, it will have achieved its objective.

We are indebted to all of the persons at the community colleges who prepare data for submission to the State Board. Special thanks are in order to Mrs. Maxine Pope, of the State Board for Community Colleges staff, who prepared the manuscript for publication.

James D. Tschechtelin
Executive Director

SECTION I.

HIGHER EDUCATION IN GENERAL

HIGHER EDUCATION IN GENERAL

Later sections of this report deal exclusively with Maryland community colleges. This first section, however, is intended to provide perspective through comparison of data for all higher education in Maryland.

Maryland operates what is often referred to as a "modified tripartite" structure of higher education. The campuses of the University of Maryland comprise the University segment. Four public colleges and two public universities comprise the State College and University segment under a single board of trustees. Morgan State University and St. Mary's College, two public four-year institutions with special missions, operate under their own governing boards. The largest segment of higher education is comprised of the seventeen community colleges, each operating under their own board of trustees. These public two-year institutions are funded by both State and local resources.

In addition to the public institutions, there are two other categories of postsecondary education. These are the independent nonprofit (private) colleges and universities and the independent postsecondary (proprietary) institutions.

SECTION II.

ENROLLMENT

ENROLLMENT

This section of the report summarizes aspects of community college enrollment. Community college students represent a diverse population attending full-time and part-time, weekdays and weekends, on campus and off campus, in credit degree and certificate programs and noncredit continuing education courses. Students attend community colleges preparing for immediate employment, for transfer to baccalaureate-level institutions, and for personal enrichment.

The exhibits contained in this section present current enrollment data and historical trends by college and systemwide. Various enrollment characteristics are shown in individual tables. In understanding the material, the following parameters may be helpful.

Headcount figures refer to the unduplicated number of individuals enrolled at a given time and thus represent a "snapshot" in time. Headcount figures are derived from opening Fall credit enrollments.

The State of Maryland funds community colleges not on headcount enrollments but on full-time equivalent enrollments (FTEs). An FTE is computed by dividing the number of credit hours generated for the full fiscal year by 30. An FTE thus is analogous to a hypothetical full-time student carrying 30 credit hours during the academic year. In the typical pattern, this would be five three-credit courses during each of the two regular semesters.

Credit enrollments represent registrations at the end of the third week of classes in degree and certificate programs. Equated credit enrollments represent conversion of contact hours of instruction at the 20 percent point in continuing education courses. The conversion used is that 15 contact hours of instruction equal one equated credit hour.

Community college enrollments are reported by a wide variety of characteristics. Shown in this report for illustrative purposes are enrollment by race, place of residence, program, and age. For these and certain other characteristics, historical trends are shown as well as current data.

SECTION III.

STUDENT FINANCIAL SUPPORT

STUDENT FINANCIAL SUPPORT

Since the establishment of Maryland's first community colleges nearly four decades ago, the emphasis has been upon quality and access. Community colleges make quality higher education programs readily accessible--geographically, socially, and financially to the citizens of the State.

Financial accessibility is so paramount that the applicable section of the Annotated Code of Maryland admonishes community college boards of trustees in exercising their statutory authority to establish tuition and fees, to do so "with a view to making college education available to all qualified individuals at low cost." Further, such student charges should be kept "reasonable." Education Article, Section 16-203(j).

Maryland community colleges have taken the statutory admonition seriously in efforts to limit tuition increases. Increases generally have been modest and in relative proportion to the Consumer Price Index, Higher Education Price Index, and tuition scales of other institutions, nationally and in Maryland. Nonetheless, required tuition and fees are only part of a student's costs of attendance. Books are both necessary and expensive. Since community colleges are commuter institutions, students must have funds for public or private transportation to and from classes. A student also needs to eat, whether on campus or in the community.

Maryland community colleges have drawn increasing numbers of older, self-supporting, employed students with family obligations. For these students there is also the cost of maintaining a family while at the same time foregoing some or all income while attending class rather than working. These so-called "independent" students, who cannot depend on the resources of their parents to sustain and educate them, provide a major challenge for all of higher education, most particularly community colleges where such nontraditional students predominate.

For all of these reasons, Maryland community colleges have experienced rapid growth in the need for student financial support. This support includes not only traditional sources of financial aid (often referred to as student assistance) but also funds from other sources, including off-campus, full-time employment; veterans' benefits; tuition waivers for the elderly and disabled/retired; and special programs for displaced, dislocated, and unemployed workers.

A new section has been added to this year's Databook--Student Financial Support. Shown in this section is information from the State Board for Higher Education on the types and amounts of student financial support received by students attending Maryland community colleges. The data are shown for grants, including Pell and Supplemental Educational Opportunity Grants; loans, including National Direct and Guaranteed; scholarships, General State, Senatorial, and others; and student employment, including College Work Study and Institutional Programs.

DEGREES AND CERTIFICATES AWARDED

- 53 -

DEGREES AND CERTIFICATES AWARDED

Many students enroll in Maryland community colleges to pursue individual courses without intending to complete a full program of studies. In contrast to certain other types of institutions, short-term training of individuals enrolling with no degree aspirations is an accepted and important mission of the community colleges.

Nonetheless, a large number of students do attend community colleges to pursue a program leading to a formal award. Two types of awards are granted by community colleges: certificates and associate degrees.

Certificates are awarded for satisfactory completion of a program of studies representing a planned sequence, which consists of at least 12 credit hours of college-level instruction at the freshman and sophomore levels. Most certificates can be completed in one year of full-time attendance, and all are in career areas designed for immediate employment.

Community colleges also award associate in arts degrees. Such programs require satisfactory completion of a planned sequence of learning experiences consisting of at least 60 semester hours of college-level work. Each degree program must contain at least 15 semester hours of required arts and science courses distributed among the humanities, natural sciences and mathematics, and social sciences.

Students attending full-time may complete degree programs in two years. Degrees may be pursued in transfer or occupational (career) programs.

Transfer curricula require courses in English, foreign languages, social sciences, natural sciences, mathematics, and fine arts equivalent to those prescribed in the lower division of four-year colleges and universities. A series of articulation agreements statewide assure that students can transfer to baccalaureate institutions with little or no loss of credit.

Occupational curricula leading to the associate degree require, in addition to general degree requirements, satisfactory completion of at least 24 semester hours of required courses designed for the occupation for which preparation is offered. Although these programs are designed for immediate employment, some occupational courses can be used for transfer.

Community colleges do not grant formal awards for completion of continuing education courses. However, some continuing education courses do carry continuing education units (CEUs), a nationally recognized measure of student achievement. In addition, letters of completion may be issued for noncredit courses and sequences of credit courses constituting less than 12 credit hours.

SOURCE: DEGREE INFORMATION SYSTEM

REVENUES AND EXPENDITURES

The exhibits in this section describe the financial operations of Maryland community colleges. Information is shown for the fiscal years indicated. Some tables and figures are for individual community colleges and some are for the community colleges systemwide. Each is clearly identified.

Maryland community colleges operate under a uniform chart of accounts in accordance with statute and with regard to generally accepted accounting principles applied on a consistent basis. The budget of each community college is as approved by the local political subdivision(s).

The State Board for Community Colleges collects extensive financial data on all aspects of community college operations. The State Board also is responsible for assuring that community colleges are audited annually under the statute and Board policies. This report only provides an overview; additional information is available at the State Board office.

For purposes of presentation on these pages, analysis is limited to the sources and uses of current unrestricted funds. As defined by the American Institute of Certified Public Accountants, current unrestricted funds are used to account for resources that are expendable for any purpose in performing the primary objectives of the institution, for example, instruction. Excluded from this analysis are capital funds and current restricted funds. Restricted funds provide for the accountability of money, expendable for operating purposes but restricted by donors or other outside agencies as to the specific purpose for which they may be expended.

The largest proportion of current restricted funds flowing to community colleges is federal funds for student financial assistance. Also included in restricted funds are vocational education funds, Job Training Partnership Act funds, and aid to developing institutions, as well as other grants or contracts.

All revenues are shown by source--State, Local, Student, and Other. All expenditures are shown by function and object. Functions for community colleges are specified by statute and include Instruction, Student Affairs, General Administration, and Plant Operation. Examples of objects are Compensation, Contracted Services, Utilities, and Fixed Charges.

For over three decades, the State of Maryland consistently has funded a major portion of the community college employer costs of Social Security and retirement. Many of these fringe benefit costs have been paid on behalf of the colleges directly by State government. Therefore, these expenditures have not been shown in college financial records or State Board reports. Beginning in FY 1984, a process was initiated by the State to reflect these costs directly in the State Board for Community Colleges budget. The State Board has displayed their impact on the relative contributions of community college costs borne by the State, local subdivisions, and students. Readers should exercise caution in making year-to-year comparisons because of the inclusion of this element.

COST OF ADMINISTERING STATE AID TO COMMUNITY COLLEGES
BY MARYLAND STATE BOARD FOR COMMUNITY COLLEGES
FISCAL YEARS 1982 - 1987

	Actual FY 1982	Actual FY 1983	Actual FY 1984	Actual FY 1985	Budgeted FY 1986	Estimated FY 1987
Full-time equivalent students	60,735	64,054	65,882	64,895	63,882	63,242
Cost of administration by SBCC (General Funds only)	\$373,141	\$409,800	\$446,462	\$561,876	\$601,071	\$613,191
Cost of administration by SBCC per full-time equivalent student	\$6.14	\$6.39	\$6.78	\$8.66	\$9.41	\$9.69
State Aid administered by SBCC	\$59,026,588	\$60,855,627	\$64,392,828	\$87,748,907	\$96,956,647	\$98,148,705
Cost of administration by SBCC as a percent of State Aid	.63%	.67%	.69%	.64%	.62%	.62%

NOTE: Beginning in FY 1984, the State has progressively added State paid fringe benefits to the agency and the college budgets. These fringe benefits were formerly included in the State's Department of Personnel and Department of State Retirement and Pension Systems' budgets.

SECTION VI.

EMPLOYEES

EMPLOYEES

Community colleges represent a shared partnership between the State of Maryland and the sponsoring political subdivision(s). For this reason, salaries, fringe benefits, and number of employees vary from college to college based on history, size, type of program, and willingness of local government to support personnel costs.

As is customary in higher education, community college faculty are appointed to the rank of professor, associate professor, assistant professor, and instructor. Faculty are paid in accordance with academic rank and experience. The majority of faculty serve on ten-month contracts. Most Maryland community colleges use a faculty system of tenure; however, some do not.

Some faculty and all administrators serve on twelve-month contracts. The number of full-time community college employees has remained relatively constant or has declined during recent years. This has been accomplished through the employment of more part-time faculty. Part-time employees generally are not eligible for college-provided fringe benefits.

While salaries of community college faculty and staff are established and paid by individual community college boards of trustees from funds appropriated by the sponsoring political subdivision in accordance with the approved budget, the major costs of certain employee fringe benefits are supported in part by the State. In the past, these costs, paid directly by State and local government and not shown as an expenditure of the college, have not been shown in this and other reports.

In general, full-time faculty members, clerical employees, and designated professional employees are eligible to participate in the State Teachers' Retirement and Pension Systems, and the employer costs for these employees are borne by the State of Maryland. In addition, professional employees may elect to participate in the higher education optional retirement program administered by TIAA/CREF and, if they do so, the employer costs for these individuals are also paid by the State. The State pays the major portion of employer costs of Social Security for full-time faculty teaching credit courses and certain other employees.

Employees other than those mentioned above may, at the option of the college, be enrolled in the State Employees' Retirement and Pension Systems, local county retirement plans, or private pension plans. These employer costs are paid by the college or local sponsoring subdivision. Such employees include part-time faculty, continuing education faculty and staff, technical/service employees, and bookstore, cafeteria and maintenance workers. The employer's share of Social Security on behalf of these employees is not paid by the State.

ADMINISTRATIVE SALARY SURVEY
MARYLAND COMMUNITY COLLEGES
FISCAL YEAR 1986

Colleges have been grouped according to size—small, medium, and large—determined by total headcount enrollment. The number in parentheses designates incumbent's number of years in position.

SECTION VII.

PHYSICAL FACILITIES

PHYSICAL FACILITIES

Maryland community colleges maintain extensive modern facilities for the conduct and support of instruction. Sixteen of the seventeen community colleges have their own permanent campuses. Wor-Wic Tech Community College was designed to operate as a "college without walls" and thus does not have permanent facilities. None is operated in temporary facilities.

Maryland community colleges are nonresidential institutions. No housing facilities are provided.

Since the establishment of Maryland's first community colleges in 1946, State and local governments have participated in community college capital costs. Since 1961, the State share, funded through bond issues, has been on a formula basis. The State generally pays at least 50 percent of the cost of eligible space in accordance with State Board policies and guidelines approved by the Board of Public Works.

In addition to the space currently available or projected, community colleges have developed a variety of alternatives to the construction of permanent facilities. These have included the operation of off-campus instructional centers, the use of excess public school facilities, and the establishment of branch campuses in counties not currently maintaining their own community college. The combination of these efforts has encouraged the provision of broader and more accessible service to the public while at the same time limiting the need for additional expenditures.

SECTION VIII.

OTHER CHARACTERISTICS

- 109 -

OTHER CHARACTERISTICS

Community college activities are centered around instruction. In contrast to other types of institutions, community colleges generally do not engage in sponsored research, and faculty efforts are devoted exclusively to activities related to student learning.

Faculty typically are assigned to teach 15 credit hours of instruction per semester. This teaching load and the student-faculty ratio, indicated in the second exhibit in this section, are major components of the effort to maintain relatively low instructional costs.

The Annotated Code of Maryland authorizes each community college board of trustees to "...charge students reasonable tuition and fees set by it with a view to making college education available to all qualified individuals at low cost" (Education Article, Section 16-203 (j)).

Tuition schedules vary from college-to-college. Each college, however, establishes a fee structure for three categories of individuals: residents of the service area, Maryland residents from outside the service area, and out-of-state residents. Students from outside the jurisdiction(s) supporting the college pay higher charges.

Maryland community colleges are governed at the local level and coordinated at the State level. State coordination and oversight are performed by the State Board for Community Colleges. The State Board, appointed by the Governor with the consent of the State Senate, is served by a small staff in Annapolis, organized as shown in this section.
